RECEIVED

To Whom It May Concern:

I read your report with total disbelief that you write about my premises and business as some non entity. It is totally obvious that you have had consultation previously with the N.I.H.E, local community and other groups but you write about replacing my premises with housing but not once have I or any other business owner in the area been approached. I find it distressing and worrying that I have viewed plans and maps showing my business being replaced with housing, I presume before it is planned to demolish my business and livelihood you will consult with me first. The name of the report is regeneration but obviously only to benefit certain parties. Myself and other businesses in the area have made more investment locally than most and we would expect to be treated as fairly. We need to be considered and not ignored, building more housing to replace a cross community business is a very blinkered plan. When there was no windfall grants and government investment you were happy for my business to continue trading in the area, I wish to stay in this area and trade. My investment and time has been in this area for ten years. Please start talking to local business people as we probably own the most land and property in the area you want to regenerate.

Sincerely,

David Wilson
