Introduction

The Social Welfare Statistics and Consultancy Branch of the Department for Social Development (DSD) have developed a set of analyses from its existing scans of Social Security Benefit administrative data for the persons of Working Age and their Children and the persons over State Pension Age in Northern Ireland.

By matching data from the individual benefit scans an estimate can be made of the number of people who were claiming at least one of the key benefits that are available to the working age population and those over state pension age. People are assigned a statistical group depending on which key benefits they are claiming (see Definitions and Conventions).

Section 1 analyses persons of working age in receipt of the key benefits which are available to persons of working age with the main exception of Bereavement Benefit and Housing Benefit. Section 2 analyses the children of persons of working age on key benefits. They are designed to give a good indication of the size of the population on these benefits and how this changes over time. However, they are affected by changes to the conditions of entitlement and to the existence of the benefits themselves. No attempt has been made to adjust the series for such factors.

Section 3 analyses persons of pensionable age on key benefits that are available to persons over state pension age with the main exception of Widow's and Bereavement Benefits and Housing Benefit.

Information on the key characteristics of these claimants is also available for age, gender, duration, family type and regional analysis. It is also possible to look at changes in the composition of the statistical groups in the benefits system over time. Analysis of the movement on, off and between the benefits is also included (see Methodology).

The Appendices give additional information on Child Support Agency and Maternity Allowance data which are not included in the analysis of children in section 2.

The definitive details of caseloads and characteristics of claimants of each individual benefit can be found in the separate publications and press releases that Social Welfare Statistics and Consultancy Branch issue.

Definitions and Conventions - Sections 1 and 2

Key benefits

Jobseeker's Allowance (JSA)

Incapacity Benefit (IB)

Severe Disablement Allowance (SDA)

Disability Living Allowance (DLA)

Income Support (IS)

Symbols and conventions

Working age is 16 to 64 years for men

16 to 59 years for women

Population estimates are mid year from 1998 to 2004

16-18 year olds in full-time education from 1998/99 to 2003/04

“.” not applicable

[Pension Credit (PC) for males aged 60 - 64 which replaced Income Support for persons aged 60 and over in October 2003 is also included]

Tax Credits

Child Tax Credit (CTC)

Statistical group

Claimants are assigned to one statistical group in the following order

Unemployed

Claimant in receipt of JSA (including credits)

Sick and Disabled

Claimant in receipt of one or more of IB (including credits), SDA, DLA, IS with a disability premium

Lone Parent

Single people with children on IS and not receiving a disability related premium

Others

IS claimants not in other groups, males aged 60 - 64 in receipt of Pension Credit

Family type

This is based mainly on whether the claimant has a partner and dependants for which additional amounts of benefit are payable. These are payable with all benefits except:

JSA (Contribution based only or Credits)

details available for partners, children's details may be incomplete

IB/SDA

details available only for claimants who qualify for a child and/or partner allowance (not payable in all cases)

DLA

no details available

Benefit type

Income replacement

IS, JSA (excluding credits), IB (excluding credits) and SDA

Other

DLA

NI Credits

Through claiming JSA or IB

Benefit entitlement

Contributory benefits

IB, Contribution based JSA

Means tested benefits

IS and Income based JSA

Other benefits

SDA, DLA

NI Credits

Through claiming JSA or IB

Definitions and Conventions - Section 3

Key benefits

Attendance Allowance (AA)
 Incapacity Benefit (IB)
 Severe Disablement Allowance (SDA)
 Disability Living Allowance (DLA)
 Pension Credit (PC)
 (Income Support prior to October 2003)
 Retirement Pension (RP)

Symbols and conventions

State Pension Age is 65 years and over for men
 60 years and over for women
 Population estimates are mid year from 1998 to 2004
 “.” not applicable

Statistical group

Claimants are assigned to one statistical group in the following order

Sick and/or disabled	Claimant receiving one or more of AA, DLA, IB, SDA or on PC and - in a residential care or nursing home; - sick days being recorded; - hospitalised cases or an RP claimant and - in hospital - receiving Invalidity Allowance (IVA)
Non Disabled PC	PC claimants not included in the sick and/or disabled category
RP only	RP claimant not in other statistical groups above.

Note that the statistical groups refer only to SSA benefits. The majority of claimants within the RP only statistical group will also be receiving income from other sources e.g. occupational pensions and investments.

Benefit Combinations

Statistical group	Description
Sick and/or Disabled	1 AA or DLA
	2 IB or SDA
	3 One of AA or DLA and one of IB or SDA
	4 PC only or PC with one or more of AA, DLA, IB and SDA
	5 RP only (receiving IVA or in hospital)
	6 RP and one of AA or DLA
	7 RP and PC
	8 RP and PC and one of AA or DLA
Non Disabled PC	9 PC claimants not in sick and disabled statistical group
RP Only	10 Receiving RP only and not in other statistical group

Section 1: Persons of Working Age on Key Benefits

1.1 Age and Gender

Table 1.1.1 Claimants of key benefits by gender: November 2001 to November 2004

Women	93,780	92,220	92,520	91,500
% of pop ²	19	18	18	18

¹ Excludes DLA only claimants

² Population of working age in Northern Ireland - see Methodology

- In November 2004 about 21% (222,280) of people of working age claimed a key benefit – down from 22% (222,740) in November 2001.
- About 118 thousand men of working age claimed a benefit, compared with 104 thousand women. Some of that difference was due to differences in retirement age and because men normally claim a means tested benefit on behalf of a couple.
- The overall number of claimants fell by 460 between November 2001 and November 2004.
- In November 2004 about 19% (200,820) of people of working age claimed a key out-of-work benefit - 20% (204,920) in November 2001.
- Older people were more likely to be claiming benefits. In 2004, 34% of those aged 55 to 59 claimed a benefit compared to 15% of those aged 18 to 24.
- Five age groups have increased in size since November 2001. The greatest increase was in the 55 to 59 group (up by 1,860). The largest reduction in size was in the 25 to 34 age group which fell by 5,180.

Table 1.1.2 Claimants of key benefits by age and gender: November 2004

	All		Men		Women	
		% of pop in age group		% of pop in age group		% of pop in age group

60 to 64	17,400	49	18,040	46

1.2 Family Type

This section contains analyses of the type of family in which claimants live. Family type was assigned according to whether the claimant had a partner and/or children. It was not possible to assign a family type in every case (Not known).

Table 1.2.1 Claimants of key benefits by family type¹ and gender: November 2004

	All	%	Men	%	Women	%
All	222,280	100	117,860	100	104,420	100
All couples	41,040	18	24,600	21	16,440	16
Couple - no children	11,680	5	10,080	9	1,600	2
Couple - children	29,360	13	14,520	12	14,840	14

Single - no children	78,900	35	53,020	45	25,880	25
Single - children	40,980	18	2,980	3	38,000	36
Not known	61,360	28	37,260	32	24,100	23

¹ See Methodology for further details

- 119,880 claimants were single in November 2004.
- 32% (70,340) of claimants had children. The majority of claimants with children (40,980) were single.
- **The methodology used to assign information about children's details has been revised following the introduction of CTC in April 2003. Comparisons of family type and comparisons over time are affected by these changes. Please see Methodology for further details.**

**Table 1.2.2 Claimants of key benefits by family type¹: November 2001 to November 2004**

	Nov-01		Nov-02		Nov-03		Nov-04

1.3 Statistical group and transitions

The claimants of key benefits were divided into statistical groups, based mainly on the type of benefit they received (see 'Definitions and Conventions'). This gave an indication of the main reason why they were in the benefit system.

Table 1.3.1 Claimants of key benefits by statistical group and gender: November 2004

	All	Men	Women
All	222,280	117,860	104,420
Unemployed	28,260	21,900	6,360
Sick & Disabled	155,580	85,880	69,700
Lone parents	26,080	1,320	24,760
Others	12,360	8,760	3,600

- The overall numbers fell by 460 between November 2001 and November 2004, mostly because of the unemployed group which fell by 7,880 (22%) over this period.
- In November 2004, 3% (28,260) of people of working age were classed as unemployed - down from 4% (36,140) in November 2001.
- Sick & disabled claimants were consistently the largest group between November 2001 and November 2004, rising from 65% of the total to 70% of the total; unemployed claimants were the second largest group.
- The size of the sick & disabled group rose by 11,380 (8%) between November 2001 and November 2004, whilst numbers in the lone parents group fell by 3,760 (13%) over the same period.

Table 1.3.2 Claimants of key benefits by statistical group: November 2001 to November 2004

	Nov-01		Nov-02		Nov-03		Nov-04	
	All	% of pop ¹	All	% of pop ¹	All	% of pop ¹	All	% of pop ¹
All	222,740	22	223,480	22	225,960	22	222,280	21
Unemployed	36,140	4	32,500	3	33,100	3	28,260	3
Sick & Disabled	144,200	14	149,680	14	153,940	15	155,580	15
Lone parents	29,840	3	28,720	3	27,140	3	26,080	2
Others	12,560	1	12,580	1	11,780	1	12,360	1

¹ Population of working age in Northern Ireland - see Methodology

These statistical group analyses showed the stock of claimants on key benefits at a fixed point in time at the end of each quarter. An indication of how people moved in and out of the benefit system was obtained by comparing records for the individual claimants who appeared in these “snapshots” over time. The analyses also looked at how people moved between benefits and/or statistical group. This methodology did not cover all flows into and out of the benefit system. For example, it missed claims that started and ended between “snapshot” dates and did not capture changes in benefit for couples where the partner became the claimant. (See ‘Methodology’ for further details).

Table 1.3.3 Claimants of key benefits by status in previous year: November 2001 to November 2004

	<u>On benefit in current year - status in previous year¹</u>				Left benefit since previous year ²
	All	Same statistical group	Different statistical group	Not on benefit	
Nov-01	222,740
Nov-02	223,480	170,720	13,580	39,180	38,440
Nov-03	225,960	174,260	12,880	38,820	36,340
Nov-04	222,280	176,060	12,140	34,080	37,760

¹ Some claimants may have left benefit and then returned to it between years

² Includes a small number of claimants who will have remained on benefit but reached state pension age

- There was a decrease of 3,680 claimants between November 2003 and November 2004. The decrease was due to the number of people leaving benefit exceeding the number of people who had joined benefit. For example, 37,760 claimants on benefit in November 2003 were no longer on benefit in November 2004 whilst 34,080 of claimants in November 2004 were not on benefit in November 2003.
- The numbers in each statistical group were also affected by movements between them. For example, 12,140 claimants who were on benefit in both November 2003 and November 2004 changed statistical group over this period.

- The numbers in the individual statistical groups were affected by movements both on and off benefit and also between the groups. For example, the overall number of unemployed claimants fell by 4,840 between November 2003 and November 2004. The number of claimants who moved out of that group (4,660) exceeded those who moved in from another group (2,640) – a reduction of 2,020. Also, the number of new claimants who joined the group (12,540) was exceeded by those who left benefit from that group (15,360) – a decrease of 2,820. When combined those figures gave a total decrease of 4,840.

Table 1.3.4 Claimants of key benefits - changes between November 2003 and November 2004

Statistical group	Movement between November-03 and November-04					Overall change ²	All on benefit in Nov-04
	All on benefit in Nov-03	Outflow Not on benefit in Nov-04	Inflow Not on benefit in Nov-03	Net movement between Statistical groups ¹			
All	225,960	37,760	34,080	0	-3,680	222,280	
Unemployed	33,100	15,360	12,540	-2,020	-4,840	28,260	
Sick & Disabled	153,940	16,360	15,960	2,040	1,640	155,580	
Lone parents	27,140	3,720	3,420	-760	-1,060	26,080	
Others	11,780	2,320	2,160	740	580	12,360	

¹ Numbers coming into statistical group less numbers moving out - see bottom half of table 1.3.5 for breakdown

² Overall change between November 2003 and November 2004 ie column 3 minus column 2 plus column 4

Table 1.3.5 Claimants of key benefits in both November 2003 and November 2004 - comparisons of statistical group

Comparison of statistical groups in 2003 and 2004 ¹	Statistical group in November 2004				
	All	Unemployed	Sick & Disabled	Lone parent	Other
All	188,200	15,720	139,620	22,660	10,200
Statistical group in November 2003					
Unemployed	17,740	13,080	3,280	260	1,120
Sick & Disabled	137,580	2,020	133,720	640	1,200
Lone parents	23,420	240	1,320	21,620	240
Others	9,460	380	1,300	140	7,640
2003 and 2004					
Total with no change	176,060	13,080	133,720	21,620	7,640
Leaving original statistical group	-12,140	-4,660	-3,860	-1,800	-1,820
Joining new statistical group	12,140	2,640	5,900	1,040	2,560
Net movement between statistical groups	0	-2,020	2,040	-760	740

¹ For example there were 17,740 claimants in the Unemployed group in November 2003 who were also on benefit in November 2004: of these, 13,080 were still in this group, 3,280 were now in the Sick & Disabled group, 260 in the Lone parent group, etc.

These analyses also looked at changes over longer time periods, as well as comparisons over the latest year. Tables 1.3.6 and 1.3.7 compared the status of the stock of claimants in November 2001 with that in November 2004.

Table 1.3.6 Claimants of key benefits in November 2004 - by status in November 2001

Benefit status in November 2004	All on benefit in November 2004	Benefit status in November 2001		
		Not on benefit	Same statistical group	Different statistical group
All	222,280	64,400	137,960	19,920
Unemployed	28,260	16,980	8,400	2,880
Sick & Disabled	155,580	36,580	107,380	11,620
Lone Parents	26,080	7,440	17,060	1,580
Others	12,360	3,400	5,120	3,840

- Around 71% (157,880) of key benefit claimants in November 2004 were also on benefit in November 2001; 62% of the overall total were in the same statistical group.
- Claimants in the sick & disabled group in November 2004 were the most likely to have also been on benefit in November 2001 (76% of them - 119,000), followed by claimants in the others group (72% - 8,960) and the lone parents group (71% - 18,640) - those in the unemployed group (40% - 11,280) were least likely. Claimants in the sick & disabled group were also the most likely to have stayed in the same statistical group (69% - 107,380).

Table 1.3.7 Claimants of key benefits in November 2001 - by status in November 2004

Benefit status in November 2001	All on benefit in November 2001	Benefit status in November 2004			
		Reached state pension age ¹	Not on benefit	Same statistical group	Different statistical group
All	222,740	19,840	45,020	137,960	19,920
Unemployed	36,140	600	18,180	8,400	8,960
Sick & Disabled	144,200	16,860	16,140	107,380	3,820
Lone Parents	29,840	80	8,460	17,060	4,240
Others	12,560	2,300	2,240	5,120	2,900

¹ Some of these claimants may also have left benefit

1.4 Benefit Entitlement

These analyses can give an indication of the level of support that claimants receive from the benefit system. Some benefits are designed to be a claimant's main source of income. There are also benefits for special needs, such as disability, which are not linked to financial circumstances. It is also possible to see whether claimants qualified for benefit through National Insurance contributions, a means test or by another route. Many of those in the sick and disabled group received more than one benefit.

Table 1.4.1 Claimants of key benefits by statistical group and type of benefit: November 2004

	All	Income replacement benefits ¹	Other benefits only ²	NI Credits ³
All	222,280	192,240	23,960	6,080
Unemployed	28,260	25,660	.	2,600
Sick & Disabled	155,580	128,140	23,960	3,480
Lone parents	26,080	26,080	.	.
Others	12,360	12,360	.	.

¹ Income replacement benefits are JSA (excluding credits), IS, IB (excluding credits), SDA

² Other is DLA

³ NI Credits includes JSA credits only, JSA credits and IB credits, JSA credits with DLA, IB credits only

Table 1.4.1a Claimants of key out-of-work benefits¹ by statistical group and type of benefit: November 2004

	All	Income replacement benefits ²	NI Credits ³
All	200,820	192,240	8,580
JSA	28,260	25,660	2,600

³ Means tested benefits are income based JSA, IS

⁴ Other benefits are SDA, DLA

⁵ NI Credits includes JSA credits only, JSA credits and IB credits, JSA credits with DLA, IB credits only

- 132,100 claimants received a benefit that was means tested in November 2004. Of those 114,820 claimants received a benefit that was means tested whilst 17,280 claimants in receipt of a means tested benefit also received or satisfied the qualifying conditions for a contributory benefit.
- In November 2004, 57,740 claimants received only a contributory benefit.

Table 1.4.5 Claimants of sickness and/or disability benefits by combinations of benefits: November 2004

	Type of benefit					
	All	IB Payment	IB Credits	SDA	Income Support	DLA
All sick and disabled	155,580	70,860	39,260	10,720	72,040	101,480
Single benefit only	56,060	26,740	3,480	200	4,180	21,460
Two or more benefits of which¹	99,520	44,120	35,780	10,520	67,860	80,020
Incapacity Benefit payment	44,120	44,120	.	.	17,160	40,480
Incapacity Benefit credits	35,780	.	35,780	.	33,280	20,520
Severe Disablement Allowance	10,520	.	.	10,520	8,320	9,920
Income Support	67,860	17,160	33,280	8,320	67,860	48,360
Disability Living Allowance	80,020	40,480	20,520	9,920	48,360	80,020

¹ Claimants with three or more benefits in payment are counted in each combination - therefore numbers by each combination of benefit exceed the overall total

- Around 64% (99,520) of sick & disabled claimants received more than one key benefit in November 2004. The main combinations included IB payments and DLA (40,480) and IS and DLA (48,360).

Table 1.4.6 Claimants of sickness and/or disability benefits by type of benefit: November 2001 to November 2004

	Nov-01		Nov-02		Nov-03		Nov-04	
	All	%	All	%	All	%	All	%

IB/SDA	114,040	79	118,420	79	121,360	79	120,840	78
IS Disabled (not also IB/SDA)	12,340	9	12,380	8	12,400	8	13,280	9
DLA only (not also IB/SDA/IS Disabled)	17,820	12	18,880	13	20,180	13	21,460	14

1.5 Duration on benefit

These analyses show the length of time for which claimants have been receiving their current benefit. In many instances this will be the same as the length of time for which they have been in the benefits system, but a significant minority may have been receiving a different benefit immediately prior to their current claim. For those who received multiple benefits, duration was based on the one they had received for the longest time.

Table 1.5.1 Claimants of key benefits by statistical group and duration of claim: November 2004

	All	Duration of oldest claim ¹				
		Under 3 months	3 to under 6 months	6 months to under 1 year	1 year to under 2 years	2 years or over
All	222,280	17,200	13,100	18,340	27,560	146,080
Unemployed	28,260	9,920	5,400	4,300	4,100	4,540
Sick & Disabled	155,580	4,320	5,900	10,780	18,560	116,020
Lone parents	26,080	1,200	1,100	1,960	3,260	18,560
Others	12,360	1,760	700	1,300	1,640	6,960

¹ Oldest benefit payable during current spell of benefit receipt

- Around 66% (146,080) of the claimants in November 2004 had been receiving a key benefit for 2 years or more.
- Of those longer duration claimants 79% (116,020) were in the sick & disabled group. That group was therefore more likely to have been on benefit for longer periods than all the others – 75% had been on benefits for 2 years or more compared with only 16% of those in the unemployed group.

Table 1.5.2 Claimants of key benefits by gender and duration of claim: November 2004

¹ Children aged under 16 and young adults aged 16 to 18

² Children whose ages are not known

³ The method used to assign children's details has been revised - see methodology for further details.

⁴ Numbers less than 100 are not disclosed due to DSD customer confidentiality policy

- In November 2004, 71,020 claimants of key benefits had children and/or young dependants.
- 33% (23,540) of claimants with children had a youngest child aged under 5. The majority of the under 5s were children of lone parents.
- **The methodology used to assign information about children's details has been revised following the introduction of CTC in April 2003.**

1.7 Children and young dependants aged under 19

These analyses show the number of children under 16 and young dependants aged 16 to 18 living with claimants of key benefits.

Table 1.7.1 Children¹ of claimants of key benefits by age of child, statistical group and family type: November 2004

¹ Children aged under 16 and young adults aged 16 - 18

² Includes a small percentage of children whose age is not known

³ The method used to assign children's details has been revised - see methodology for further details

⁴ Numbers less than 100 are not disclosed due to DSD customer confidentiality policy

- In November 2004, 118,480 children under the age of 16 were living in families in which a key benefit was claimed.
- The majority of these children 67,780 were living in single parent families.
- 17,340 young people aged 16 -18 (37% of all 16 - 18 year olds in full-time education) were living in families with a key benefit claimant.
- 21% of all young people aged 16 - 18 were living with key benefit claimants in November 2004.
- **The methodology used to assign information about children's details has been revised following the introduction of CTC in April 2003.**

1.8 Regional Analysis

These analyses show the number of working age claimants of key benefits in each Government Office Region and in each District Council within Northern Ireland.

Table 1.8.1 Claimants of key benefits by gender and Government Office Region: November 2004

IB/SDA claimants living abroad ²	9	.	6	.	4	.

¹ Population of working age

² Great Britain claimants only, a figure for Northern Ireland claimants was not available

- The proportion of the working age population claiming a benefit ranges from 9% in South East England to 21% in Northern Ireland.
- The proportion of the working age population claiming a benefit ranges from 13% (North Down) to 31% (Derry).
- The district councils with the greatest proportion of working age claimants in the sick & disabled group were Strabane (21%), followed by Belfast, Cookstown and Derry (19%). The district council with the lowest proportion was North Down (9%).
- The proportion of the working age population in the unemployed group ranged from 5% (Coleraine, Derry and Strabane) to 1% (Ballymena, Cookstown and Magherafelt).

1.9.2 Family Type

The methodology used to assign information about children's details has been revised following the introduction of CTC in April 2003. Comparisons of family type and comparisons over time are affected by these changes. Please see Methodology for further details.

Section 2 : Families with children on key benefits

2.1 Children

Table 2.1.1 Children of claimants of key benefits by statistical group: November 2001 to November 2004

	Number of children ¹							
	Nov-01	%	Nov-02	%	Nov-03	%	Nov-04	%
All statistical groups	141,780	100	137,080	100	142,580	100	135,820	100
Unemployed	9,940	7	9,100	7	8,440	6	6,060	4
Sick & Disabled	69,680	49	69,660	51	78,880	55	76,960	57
Lone parents	58,140	41	55,020	40	52,020	36	49,740	37
Others	4,020	3	3,300	2	3,240	2	3,060	2

¹ Children aged under 16 and young adults aged 16 to 18. The method used to assign children's details has been revised - see Methodology for further details

- At November 2004, 135,820 children were living in families claiming a key benefit. The total number of children in families claiming a key benefit was down by 4% (5,960) from November 2001.
- **The methodology used to assign information about children's details has been revised following the introduction of CTC in April 2003. Comparisons over time are affected by these changes. Please see Methodology for further details.**

Table 2.1.2 Children¹ of claimants of key benefits by statistical group and family type: November 2004

² Children whose ages are not known

³ Numbers less than 100 are not disclosed due to DSD customer confidentiality policy

- Amongst the sick & disabled group proportionally fewer children were under the age of five, reflecting the older age profile of those claiming a sickness and/or disability benefit (although the ages of many children in this group were unknown).
- The children of lone parents had the youngest profile with 65% aged under 11.

Table 2.1.5 Children¹ of claimants of key benefits by statistical group and duration of claim: November 2004

	Duration of oldest claim ²											
	All durations	%	Under 3 months	%	3 to under 6 months	%	6 months to under 1 year	%	1 to under 2 years	%	2 years and over	%
All statistical groups	135,820	100	5,900	4	5,820	4	9,600	7	18,100	13	96,400	71

¹ Population of Northern Ireland residents above state pension age - see Methodology

3.2 Statistical groups

The claimants of these benefits can be divided into statistical groups, based mainly on the type of benefit they received (see 'Definitions and Conventions').

- The overall numbers rose by 5,449 between August 2001 and August 2004.
- Sick and/or disabled claimants rose from 121,077 to 126,669 between August 2001 and August 2004, unchanged from 46% of the total pensioner population.
- Over the same period, the non-disabled PC statistical group grew by 5,770.
- Over the same period, the RP only statistical group fell by 5,913.

The statistical group analyses show the stock of claimants on key benefits at a fixed point in time. By comparing records for the individual claimants who appear in these 'snapshots' over time, the analyses can give an indication of how many people move in and out of the benefit system. They can also look at how people move between benefits and/or statistical groups.

Table 3.2.1 Cases over State Pension Age moving onto a key benefit between August 2003 and August 2004 by gender and statistical group

	Male	Female	All
Sick and/or Disabled	1,334	1,423	2,757
Non Disabled PC	435	369	804
RP only	1,898	3,452	5,350
All	3,667	5,244	8,911

Table 3.2.2 Cases over State Pension Age receiving key benefits at August 2003 but no longer receiving a key benefit in August 2004: by gender and statistical group

	Male	Female	All
Sick and/or Disabled	3,981	5,971	9,952
Non Disabled PC	236	416	652
RP only	1,208	1,112	2,320
All	5,425	7,499	12,924

Table 3.2.3 Cases over State Pension Age changing statistical group: August 2003 and August 2004

Statistical group in August 2003	Statistical group in August 2004			All
	Sick and/or Disabled	Non Disabled PC	RP only	
Sick and/or Disabled	0	82	143	225
Non Disabled PC	1,307	0	174	1,481
RP only	6,492	4,866	0	11,358
All	7,799	4,948	317	13,064

- 60% of claimants moving onto a key benefit(s) between August 2003 and August 2004 received the state Retirement Pension as their only benefit.
- The number in the sick and/or disabled statistical group rose by 379 between August 2003 and August 2004. However, more people stopped claiming a key benefit in this statistical group (9,952) than moved onto benefit directly into the sick and/or disabled statistical group (2,757). This rise is due to a net 7,574 moving from the other statistical groups (most importantly RP only) into the sick and/or disabled group.

Table 3.2.4 Cases over State Pension Age moving onto a key benefit between August 2001 and August 2004: by gender and statistical group

	Male	Female	All
Sick and/or Disabled	6,584	7,109	13,693
Non Disabled PC	1,645	1,558	3,203
RP only	9,023	14,687	23,710
All	17,252	23,354	40,606

Table 3.2.5 Cases over State Pension Age receiving a key benefit at August 2001 but no longer receiving key benefits in August 2004: by gender and statistical group

	Male	Female	All
Sick and/or Disabled	10,103	15,641	25,744
Non Disabled PC	499	701	1,200
RP only	4,364	3,849	8,213
All	14,966	20,191	35,157

Table 3.2.6 Cases over State Pension Age changing statistical group: August 2001 and August 2004

Statistical group in August 2001	Statistical group in August 2004			All
	Sick and/or Disabled	Non Disabled PC	RP only	
Sick and/or Disabled	0	930	239	1,169
Non Disabled PC	2,865	0	290	3,155
RP only	15,947	5,992	0	21,939
All	18,812	6,922	529	26,263

- The overall number of claimants on key benefits has risen during the period August 2001 to August 2004 by 5,449, with the number moving onto key benefits (40,606) exceeding those no longer claiming a key benefit (35,157).
- Approximately 76% of people on a key benefit in August 2001 have remained within the same statistical group in August 2004, 14% were no longer on a key benefit and 10% had moved statistical group.

- The sick and/or disabled statistical group as a whole increased by 5,592 (5%) between August 2001 and August 2004.
- RP plus AA or DLA in August 2004 accounted for 47% of the total claimants within the sick and/or disabled statistical group. This compares with 48% in August 2001.

- The numbers claiming RP, plus PC and AA or DLA have also risen. The RP, plus PC and AA or DLA group has increased from 37% to 40% of the total claimants within the sick and/or disabled statistical group over the period August 2001 to August 2004.

² Northern Ireland data is at August 2004

- Northern Ireland has by far the highest proportion claiming a key sickness and/or disability benefit at 46% compared to Wales (38%), which is next, with the South East lowest at 17%.
- For the RP only category Northern Ireland (41%) is considerably lower than any other office region, with Wales and the North East (53%) next. The highest proportion is the South East (73%).

Persons of pensionable age claiming key benefits as a percentage of the total population by District Council: August 2004

Appendix 1 - Child Support Agency

At the end of November 2004 there were 23,805 'live' and fully assessed cases held on the Child Support Computer System (CSCS) a drop of 3,501 since November 2003. This fall in the caseload is mainly due to the closure of a large number of suspended cases on the system. Also information on all new cases is held on a new computer system from which it is not possible to extract any reliable information at present. Therefore the figures for November 2004 quoted below do not give a true reflection of all cases on the CSA liveload.

The average FMA (Full Maintenance Assessment) for all non-resident parents (NRPs) increased from £13.89 in November 2003 to £14.25 in November 2004. For NRPs recorded on CSCS as an employee the average maintenance in November 2004 was £35.06 per week, an increase of £0.03 per week from November 2003. For self-employed NRPs, the average maintenance assessment increased from £20.16 per week in November 2003 to £20.48 in November 2004.

Table 1 Number of NRPs with full maintenance assessment and average value of assessment, November 2003 - November 2004

Month	FMA	Average, £pw
Nov-03	27,306	£13.89
Feb-04	26,259	£13.89
May-04	25,134	£14.03
Aug-04	24,486	£14.14
Nov-04	23,805	£14.25

Table 2 Benefit status of Parent/Person with Care (PWC), November 2003 - November 2004: full assessments

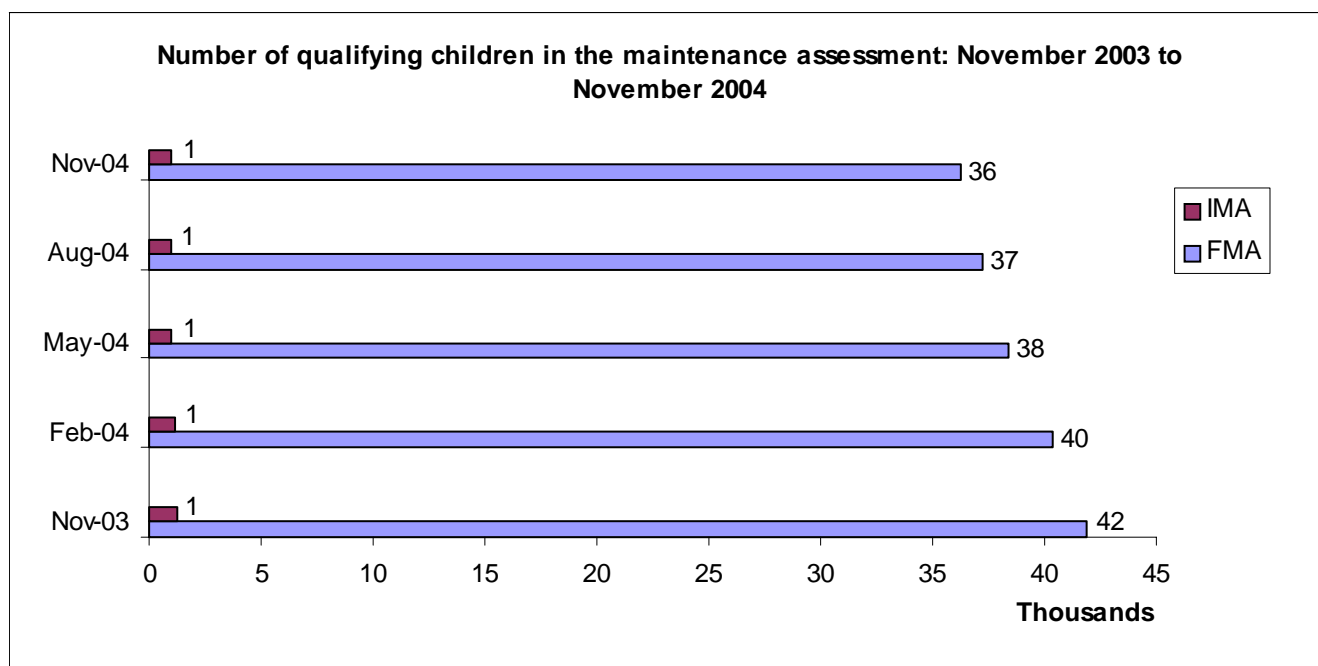

Month	PWC benefit status

Nov-04	23,805	17,538	3,510	1,257	1,500

- The number of qualifying children in the fully assessed caseload has decreased by 14% since November 2003.

Appendix 2 - Maternity Allowance

At the end of November 2004 there were 736 spells of Maternity Allowance in payment an increase of 77% on 3 years earlier.

Maternity Allowance rates (£ per week)

	Higher rate ¹	Lower rate	New Standard Rate	Threshold	Increase for dependants
Apr-92	.	42.25			25.50
Apr-93	.	43.75			26.40
Apr-94	.	44.55			26.90
Oct-94	52.50	44.55			26.90
Apr-95	52.50	45.55			27.50
Apr-96	54.55	47.35			28.55
Apr-97	55.70	48.35			29.15
Apr-98	57.70	50.10			30.20
Apr-99	59.55	51.70			31.15
Apr-00	60.20	52.25			31.50
Apr-01	.		62.20	30.00	32.55
Apr-02 ²	.		75.00	30.00	33.10
Apr-03 ²	.		100.00	30.00	33.65
Apr-04 ²	.		102.80	30.00	34.60

¹ The woman must be an employee in the 15th week before the baby is expected (the 'qualifying week').

² In April 2001 the higher and lower rates of maternity allowance were abolished and replaced by a standard rate.

Methodology

The following notes are for the interpretation of Persons of Working Age and their Children. A full description of the methodology used to produce these analyses and the possible uses that can be made of the data is available from the contact point listed.

These analyses are based on data collected through the administration of the individual benefits. They are designed to give a good indication of the size of the population on these benefits and how this changes over time. However, they are affected by changes to the conditions of entitlement and to the existence of the benefits themselves. This includes such things as the introduction of new tax credits in April 2003. No attempt has been made to adjust the series for such factors.

Summary of methodology

The analysis of Persons of Working Age and their Children have been constructed by matching 5% samples for the individual benefits. People in these individual samples are selected using the last two digits of the National Insurance number (NINO). This sampling scheme ensures that the same set of people will be selected for each individual benefit and time period that they have a live claim.

(Note: The analysis of Persons of Pensionable Age has been constructed by matching 100% scans for the individual benefits that they cover).

To produce the client group analyses, a common “snapshot” date is chosen and the NINOs for each person claiming a benefit on this date are selected. The NINOs are then matched to produce an overall data set for those who are claiming at least one benefit on the snapshot date. The individual data items used for the various analyses (e.g. age, sex, number of children) are then taken from the source data sets and additional variables are then derived (e.g. statistical group, family type).

This methodology gives a “best estimate” of the overall number of claimants of benefits. However, there are some minor limitations (for example, the sample of JSA claimants is taken about two weeks before the snapshot date). The best estimates of the numbers claiming each benefit are still given by the individual samples from which the data are drawn. Benefit statistics are published by Social Welfare Statistics and Consultancy Branch, Department for Social Development.

For analyses relating to family type and children/young adult dependants, Child Tax Credit (CTC) data has been used to supplement the benefit data. This provides information on partners and dependants of non income-related benefit claimants i.e. IB, SDA, DLA and JSA (Contributory and Credits) claimants, which was previously not available. In cases where both a key benefit and CTC is claimed, for example IS claimants with children, the CTC data has been the preferred source. However, where partner information is available from both benefit and CTC data, the benefit data has been the preferred source. This is because CTC is becoming the primary means of paying additional money for children, whilst benefits remain the primary means of paying money in respect of partners. In the vast majority of cases the information on children/young adult dependants and partners will be the same on both sources of data.

In addition, Social Welfare Statistics and Consultancy Branch have been able to match partner’s and dependant’s details in this publication from other data sources i.e. Child Benefit and Child Support Agency.

In sections 1.6, 1.7 and in the Children’s section, the analysis is based on Children of Working Age Claimants where we have been able to match details from either the Key Benefits themselves,

CTC or from Child Benefit and Child Support Agency scans. There are a small number of children where their age is not known. It is assumed for the purposes of the relevant sections that they are '15 or less'.

Family type and “People on benefits”

The Family Type analyses in section 1.2 cover claimants who receive additional money via benefits or tax credits for their partner and/or children and young adult dependants. Full information on children is available from benefit and/or CTC data regarding families in receipt of an income-related benefit i.e. IS and JSA (income based) claimants. Information on children is available from CTC data regarding families in receipt of a non income-related benefit i.e. IB, SDA, DLA and JSA (Contributory and Credits)). The main gaps are children/young adult dependants living in families receiving non income-related benefits where there is no entitlement to CTC or where there is entitlement to CTC but it is not in payment.

The effect of New Tax Credits

In April 2003 Working Families' Tax Credit, Disabled Person's Tax Credit and Children's Tax Credit were replaced by Child Tax Credit (CTC) and Working Tax Credit (WTC). The New Tax Credits are administered by the Inland Revenue. Figures in this and future publications are affected by the introduction of the CTC. The main changes are

- Increases for child dependants paid with non-means tested benefits were abolished for new claims to Bereavement Benefit, Carer's Allowance, Incapacity Benefit and State Pension from April 2003.
- Child elements of Income Support and income-based Jobseeker's Allowance will be replaced by CTC from April 2004.

As a result particular changes may have occurred at

- April 2003, when increases for child dependants paid with non-means tested benefits were abolished for new claims
- October 2003, when families on Minimum Income Guarantee with children had the child elements transferred to CTC.
- Financial year 2004/2005, when families on Income Support and income-based Jobseeker's Allowance will have the child elements transferred to CTC.

A small number of former IS/JSA(IB) recipients will no longer be eligible once CTC is in payment. This is because CTC payments raise total income above the IS/JSA(IB) threshold, or other income exceeds the threshold once child allowances have been removed.

Therefore caution should be exercised when performing year on year comparisons or comparisons with the previous quarter. The main effect of incorporating CTC data has been to obtain additional information on partners and children/young dependants of non income-related benefits. This has resulted in many claimants' family type changing from 'not known' to another category, in particular 'couples with children' (section 1.2).

Statistical groups

Claimants have been allocated to statistical groups to give an indication of the main reason why they are claiming benefit (see Definitions and Conventions). This is only one of the possible ways in which claimants could be classified and alternative classifications are possible.

Transitions analyses

The transitions analyses shown in section 1.3 of this bulletin are produced by matching the “snapshot” data for the stock of claimants with a live claim at the end of each quarter. By matching claimants who appear in different quarters, we can get an indication of how many move on, off and between the benefits that are included. These analyses do not cover all claimants who come on and go off these benefits over the period covered by the analyses. For example, they do not cover those claims of very short duration, which start and end between the “snapshot” dates.

Also, as they are based on matching NINOs of claimants of these benefits, they do not cover all possible movements into and out of the benefit system. For example, if a claimant leaves Income Support because his partner claims Jobseeker’s Allowance, the analyses will not capture this change.

The importance of these “missing flows” will depend mainly upon the use that is made of the data. If, for example, we want to analyse the number of different benefits that a claimant receives over a three-year period, these analyses should be able to produce a good measure of it. However, if we were attempting to produce a similar analysis based on benefit units, we could miss a significant number of flows - for example, where the partners in a couple alternate as to who makes the claim for a benefit when the family circumstances change.

In October 2003, Pension Credit (PC) replaced Income Support for persons aged 60 or over. PC has 2 elements: the Guarantee Credit (GC), which replaced IS for people aged 60 and over; and the Savings Credit (SC), which rewards pensioners who have modest income or savings. The majority of persons aged 60 or over receiving IS on 6 October 2003 were automatically transferred to PC. However, there were a small number of claims which were not transferred to PC. These were mainly cases where the claimant was aged under 60 and the partner was aged 60 or over.

Additional pensioner households not previously entitled to IS are entitled to PC. These are households who have deemed income from savings and/or a second pension that takes them above the guarantee level in GC but who are now rewarded for those savings via the SC. The knock on effect for the analysis of persons of pensionable age is that the non-disabled PC group is larger than the previous non-disabled IS group.

Statistics for persons of working age and their children for November 2003 - August 2004 have been revised to include males aged 60 - 64 in receipt of PC. Prior to October 2003, these individuals were included in the analysis as IS claimants.

IS claimants on Government Training schemes

Prior to the introduction of JSA, people on Government Training schemes could claim Income Support. When JSA was introduced in October 1996, these claimants now had to claim Income-based JSA. They are not included in the client group analysis in this bulletin as validated source data are not currently available.

Clerical Cases

Some of the claims to each of the key benefits featured in this bulletin are not administered using the relevant DSS computer system. These claims are administered clerically and make up a very small proportion of people of working age who claim a key benefit.

Population Estimates

The Northern Ireland Statistics and Research Agency have revised the population estimates for 1998 - 2000 as a result of the 2001 Census.

Child Benefit

From April 2003, Child Benefit was administered by Inland Revenue. Statistics are now produced by Her Majesty's Revenue and Customs and can be found on www.hmrc.gov.uk/stats/child_benefit/menu.htm

Sampling Errors

The analyses in this report are subject to ‘sampling error’, i.e. there is a chance that the number of cases in the sample may produce population estimates that are slightly lower or slightly higher than the true population value. An indication of the effect of these sampling errors can be gained from the tables of ‘confidence intervals’ below. The size of this range is usually indicated by a “95% confidence interval” i.e. there is only a 1 in 20 chance that the true value lies outside of this range. Usually this interval is approximately symmetric so, for example, an estimate of 10,000 is really showing that the true value lies in the range of 9,146 to 10,854.

The above method applies only to estimates of numbers of claimants and not to other characteristics.

Estimated Value	95% Confidence Interval	Confidence interval as a % of the Estimate
700	+/-226	+/-32%
800	+/-242	+/-30%
900	+/-256	+/-28%
1,000	+/-270	+/-27%
