**Subject:** Social Housing for Brown Square

### To Who it May Concern

I am responding to your booklet that I received by post. I am one of many residents in the Brown square Area ,I currently live in the older housing of the area (Brown/Boyd street), for many years we have been told that we would be getting new social housing, I was glad to hear that the the minister has invested money into the area as I say I live in the older part of the area in the older house's on Brown Street and the housing is not good. I go to are local community meetings about updates on developments and housing issues and I just want to pass my views on to you. I do think that if the older house's comes down we can get better housing for the residents that are in the Brown Square Area and that we could get better social housing for young families in the area. Most of the other residents in the area agree with this. I have spoke to the northern Ireland housing executive at these meetings and they give very little away about future developments they have said that the older house's will be coming down at some stage but they don't say when this all will be happening. They also own land behind both of these streets and I just don't understand why they don't just build new houses as the land behind these streets is not being used and is sitting empty and I personally believe that it could be used to help the community by building new houses so that people can be rehoused for better living conditions. Lets hope that this is what happens for the good of the community and the area. I did notice that just behind Carrick hill west link a new housing development has just been finished recently and it looks great that's just what this area needs to brighten up the rundown streets of Brown/Boyd street and the front of Peters Hill.

I would appreciate that you will take my views on board

Kind Regards

David Greer  
15 Brown Street
