Subject: NORTHSIDE URGAN VILLAGE DRAFT REGENERATION FRAMEWORK PUBLIC CONSULTATION

The West Belfast Partnership Board broadly supports the concept plan for the future regeneration of the North West Quarter of Belfast.

The key principles to:

- Improve connections from the city centre to the adjoining neighbourhoods.
- Maximise the physical, social and sustainable economic regeneration of the area.
- Respect the historic character of the area.
- Tackle social exclusion through physical development by addressing problems associated with disadvantage such as housing need, unemployment, ill-health, benefit dependency and educational underachievement.
- Give regard to environmental sustainability in design of buildings and use of material for construction.
- Best use of land

These proposals should lead to the overall sustainability and economic regeneration of the North of the City and the Vision for the Regeneration of Belfast City.
