Introduction

The State Retirement Pension was first introduced on 1 January 1909. The foundation of a universal contribution-related basic Retirement Pension was laid in the 1940s.

There are two main types of Retirement Pension: **contributory** and **non-contributory**. Contributory Retirement Pension consists of any combination of a Basic Pension (BP), Additional Pension (AP) or Graduated Retirement Benefit (GRB). Non-contributory pension consists of a Basic Pension plus any Graduated Retirement Benefit that is due.

The two categories of contributory retirement pension are:

- Category A-based on a person's own National Insurance contributions, and
- Category B-dependant on the contributions paid by a spouse.

The two main conditions for payment are that:

- the person has reached State pension age (presently 65 for men, 60 for women), and
- the contribution conditions are satisfied.

People who meet the contribution conditions get a flat rate basic pension at the standard rate. If the conditions are only partly met, the basic pension is paid pro rata. To get the minimum basic pension payable (25 per cent) a person normally needs 10 or 11 qualifying years. From April 1978, a person's contribution record can be protected, if their opportunities to work are limited because of responsibilities at home, such as bringing up a family or looking after a sick or disabled person.

Extra money for dependant children can be paid with Category A or B pensions. Extra money can also be added to a Category A pension for a dependant spouse or someone who looks after the children.

The Categories of non-contributory retirement pension are:

- Category C-payable to people over State pension age on 5 July 1948. The widow of a man who was over 65 in July 1948 can also get a category C pension.
- Category D-is awarded to people who
 - reach the age of 80
 - satisfy certain residency conditions, and
 - failed to qualify for a category A or B pension, or
 - receive less than the non-contributory rate.

If a person does not take their retirement pension until after State pension age, or cancels their claim, they can earn increments. The amount of the increment is approximately 7.5% per year of deferred retirement on the basic rate.

The results contained in this publication are derived from a 100% validated extract of 'live' cases taken from the Pensions Strategy Computer System (PSCS).

The publication is divided into 3 sections.

- 1) Time series data.
- 2) Personal details of State pensioners at 30 September 2002.
- 3) Financial details of State pensioners entitlements at 30 September 2002.

Glossary of terms and Conventions

Glossary of terms

Age Addition

All pensioners over 80 years old get an age addition of 25p a week.

Additional Pension (AP)

This is the earnings-related benefit element of the state retirement pension; contributions are made via the State Earnings Related Pension Scheme (SERPS). The amount payable is based on the earnings between the lower and upper earnings limit for National Insurance contributions in tax years from April 1978 up to the final relevant year. The final relevant year is the last complete tax year before a person reaches state pension age. Earnings for the years before the final relevant year are revalued in line with the growth in average earnings. A widow or widower may inherit some or all of their deceased spouse's additional pension. The maximum proportion that can be inherited is to reduce in line with occupational schemes to 50% for contributors who reach pension age on or after 6 October 2010. For contributors who reach state pension age on or after 6 October 2002, the change will be phased in using a sliding scale. Men may also inherit AP if their wife dies and both of them are over state pension age or if they qualify for one of the new Bereavement Benefits from 9 April 2001.

Additional Pension Only

Additional Pension can be paid even when the person has no entitlement to a basic pension. A person can build up a small amount of entitlement to AP if they earn above the annual lower earnings limit for National Insurance Contributions in just one year. However, in order to receive the basic pension a person would normally need to have 9 or 10 qualifying years (see Introduction).

Basic Pension (BP)

This is a flat rate pension paid for each of the 4 categories listed below. Please note that for statistical purposes the tables also show two sub categories, ABL and BL (see notes below).

Category A Pension

This is based on a person's own National Insurance contributions. A composite pension, Category ABL, based on both the personal and spouse's contributions, can also be paid up to a maximum amount of 60% of the standard category A rate.

Category B Pension

This is based on the spouse's National Insurance record. It is paid when a widow or widower is not entitled to a category A pension in his or her own right. Any category A entitlement would be topped up by the spouse's contributions before a category B pension would be considered. The maximum is the same as the standard category A rate. A Category BL pension is payable when a married person is not entitled to a category A pension but their spouse is. It is currently paid at approximately 60% of the standard category A rate.

Category C Pension

A category C pension is non-contributory. It is payable to people over State pension age on 5 July 1948, and are therefore excluded from the National Insurance scheme. The widow of a man who was over 65 in July 1948 can also get a category C pension. The amount paid is equal to approximately 60% of the standard category A rate. There are a small number of cases still in payment.

Category D Pension

A category D pension is non-contributory. It is awarded to people who reach the age of 80, satisfy certain residency conditions, and failed to qualify for a category A or B pension, or who receive less than the non-contributory rate. The amount paid is equal to approximately 60% of the standard category A rate.

Contracted Out Deduction (COD)

The Additional Pension accrued between 6 April 1978 and 5 April 1997 is reduced when someone has been a member of a contracted out scheme or personal pension used in place of SERPS. Contracted out salary related schemes provide a Guaranteed Minimum Pension (GMP) worth about the same as the Additional Pension payable under the state scheme. In the state scheme this is now termed the Contracted Out Deduction. The Additional Pension is reduced by the contracted out deduction to prevent double provision. With contracted out money purchase schemes, and personal pensions, there is no guaranteed minimum but the Additional Pension is reduced in a similar way. A widow or widower is entitled to half of the GMP of their spouse. This will result in an appropriate contracted out deduction being made.

Dependency Addition

This is extra money paid for dependant children, a spouse or someone looking after the children. The rate paid for a child is always at the full rate provided there is some basic pension in payment. The amount paid for a wife or someone looking after the children is reduced in proportion to the amount of basic pension due. The maximum payable for a dependant wife is 60% of the category A rate.

Graduated Retirement Benefit (GRB)

This is paid to those people who paid into the graduated pension scheme which ended on 5 April 1975. The entitlement is based on each unit of graduated contributions paid (£7.50 for a man, £9.00 for a woman). A pensioner can delay claiming and earn increments in the same way as for other parts of the pension. A widow or widower can get half of any graduated retirement benefit for which their spouse had qualified.

Graduated Retirement Benefit Only

Provided they have earned entitlement under the GRB contribution conditions, GRB can be paid even when the pensioner does not satisfy the contribution conditions for a basic pension.

Gross Additional Pension

This is the amount payable before the Contracted Out Deduction has been applied to the Additional Pension.

Increments (Incs)

If a person does not take their retirement pension until after State pension age, or cancels their claim, they can earn increments. They get the increments with the pension they get on their own National Insurance Record, either when they do claim or five years after they have reached State pension age. The amount of the increment is about 7.5% per year of deferred retirement on the basic rate, including invalidity allowance and additional pension. The minimum deferment is 42 days. A married woman can earn increments whether her pension is based on her own or her husband's National Insurance Record or both. Increments on her husband's National Insurance Record can only be earned if the couple are both over State pension age. A widow can have increments earned by her husband added to her own subject to inheritance rules.

Invalidity Addition (IVA)

This is paid to a person who was entitled to Invalidity allowance, as an increase of invalidity pension, at any time during 8 weeks before they reach State pension age. The amount they get is the rate of invalidity allowance they were entitled to when they reached State pension age. The rate of invalidity pension is reduced by the notional rate of additional pension.

Net Additional Pension

This is the entitlement to Additional Pension after reduction for Contracted Out Deduction earned between 6 April 1978 and 5 April 1997.

Main Findings

This section summarises the key findings of the March 2002 Retirement Pension Summary of Statistics. More detailed analysis and tables are available in the main body of the publication.

Figure 1 Retirement Pension Caseload: 1996-2002

NB: Data for September 1998 are unavailable.

- The total number of persons in receipt of Retirement Pension at September 2002 is 247165. The number of men in receipt of Retirement Pension is 87879 and the number of women 159286. The proportion of men within the RP caseload currently stands at 35.6%.
- There has been a net increase of 3126 (1.3%) in the retirement pensioner caseload over the period of September 2001 to September 2002. Within this total net increase the number of men increased by 1409 (1.6%) and the number of women increased by 1717 (1.1%).

**Figure 2 Age Distribution of Retirement Pensioners:
September 2002**

Figure 2 shows the difference for the caseload for males and females by age. The main features of the age distribution are:

- Men cannot claim their Retirement Pension until they reach 65 whereas women can claim upon reaching their 60th birthday.
- Across all individual ages the number of men in receipt of a Retirement Pension is lower than the number of women. Due to the higher life expectancy for females, this imbalance increases with age. Thus in the 65-69 age group the ratio of males to females is 1:1.2 but the ratio increases to 1:8.9 for centenarians.
- The rapid decrease in numbers aged around 80-82 is a demographic effect due to the First World War and the subsequent population boom following its end. Thereafter, the declining numbers as age increases seems to be fairly constant for both sexes.
- The number of female retirement pensioners between 60 and 65 is relatively low because of the low birth rates immediately before and during the Second World War. It can also be attributed to women waiting for their husbands to retire before qualifying for their retirement pension.

**Figure 3 Caseload by Weekly Amount of State Pension Payable:
September 2002**

Figure 3 shows the distribution of the amount of weekly State Retirement Pension Payable, banded in terms of £ per week and broken down by gender. The weekly entitlement includes basic pension, net additional pension, all increments, graduated retirement benefit, age addition, any IVA payable and any relevant adjustments e.g. for hospitalisation.

- The 'spike' in the £40.00-£49.99 band is mainly due to women whom are entitled to a basic pension of £45.20 pw plus additional components based on their spouse's contributions (Category ABL and BL pensioners).
- The large numbers in the £70.00-£89.99 bands correspond to the millions of pensioners with a category A pension in their own right or those people (mainly women) who have a full basic pension based on their deceased spouse's contribution record (Category B).
- The pensioners with a weekly entitlement of £90 pw and over are predominantly cases with substantial amounts of net additional pension in payment (see figures 5A and 5B).
- The average amount of pension entitlement at September 2002 was £78.71 per week (an annual increase of 4.5%). The average amount for men is substantially higher for women; £92.49 per week (+4.2%) compared with £71.11 (+4.6%).

Figure 4 Average Weekly Entitlement to Basic Pension by Age and Sex: September 2002

Figure 4 shows the average entitlement to the basic Retirement Pension in terms of £ per week.

The main points are:

- The basic pension component represents 84.2% of the total cost of the state pension.
- On average, women's' entitlement to the basic pension is lower than for males in every age band. This disparity, however, closes with age and the average entitlement for the 90 and above age bands is almost identical. The reasons for this are:
 1. It is more likely that the woman will have a spouse and be claiming the lower rate of ABL and BL basic pension in the younger age bands.
 2. In the older age bands, a woman is more likely to be widowed and to have inherited her husband's contribution record. This raises the average entitlement to basic pension for women in the older age groups. This effect is particularly marked in the oldest age bands.

Figure 5A Male Average Entitlement To Non Basic Pension Components: September 2002

Figure 5A shows the average entitlement to the non-basic Retirement Pension components in terms of £ per week for men in September 2002.

The main features of the graph are:

- The total non-basic components are highest on average for the younger male pensioners. The most important component for the under 85s is the net additional pension, although this declines with age. This reflects the introduction of SERPS from April 1978, which allows younger pensioners more opportunity to build up a higher entitlement.
- The next most important component is graduated retirement benefit (GRB). This is the scheme preceding and replaced by SERPS. Average GRB seems fairly constant (approximately £3.00 per week) up to 93 years old but after this age it declines rapidly.
- Amounts of increments are negligible for pensioners under the age of 70 but increase steadily with age. Over the age of 100 the average amounts become more variable due to the relatively low numbers of pensioners.
- The age addition is only payable from a person's 80th birthday at a flat rate of 25 pence per week.

Figure 5B Female Average Entitlement To Non Basic Pension Components: September 2002

Figure 5B shows the average entitlement to the non-basic Retirement Pension components in terms of £ per week for women in September 2002.

The main features of the graph are:

- The total non-basic components are highest on average for the younger pensioners. Like men, the most important component for the under 80's is the net additional pension and follows a similar pattern. However, the amounts are substantially lower for women at all ages compared with men.
- The next most important component on average for women are increments. These are negligible for women under the age of 65 but increase steadily until the age of 80. Thereafter the value of increments remains fairly constant.
- The third most important non-basic component on average is graduated retirement benefit (GRB). Average GRB for women seems fairly constant (approximately £1.10 per week) up to approximately 86 but after this age it tapers down steadily.

¹ Figures are based on pensioner's entitlement recorded on PSCS at the date of extraction.

The amount of pension actually paid may differ due to adjustments.

Pensioners with zero entitlement have been included in the calculation of average weekly rates.

**Retirement Pensioners by category of pension
And total pension payable¹: September 2002**

¹ Figures are based on pensioner's entitlement recorded on PSCS at the date of extraction.

The amount of pension actually paid may differ due to adjustments.

Pensioners with zero entitlement have been included in the calculation of average weekly rates.

Retirement Pensioners¹ by category of pension
And net Additional Pension where COD is zero²: September 2002
